Corporate Fact Sheet

Learn about Workforce Modeling and EmLogis

EmLogis develops, utilizes, implements and supports software that medium to large organizations use to discover new efficiencies that create operational excellence. The key to the EmLogis solution is capturing all the real-world complexity of your business in a workforce model that scales to any number of employees, teams and skills required. This model can also be adjusted to drive schedules to precisely meet your corporate objectives - cost reduction, overtime reduction or employee preference. With the EmLogis web-based solution, industry-leading companies can ensure that they create an effective and efficient workforce model that captures staffing reality while attaining a sustainable competitive advantage.

EmLogis SOLUTIONS

Generator 4.0 is the only staff modeling system on the market that delivers proactive preference based schedules in combination with the most cost effective solution. Our system has proven its value in numerous markets:

Healthcare

Long Term Care

Retail

Service

Public Sector

Call Centers

EmLogis TECHNOLOGY

All solutions are 100% web-based. With Java based architecture, ensuring that all applications are scalable, secure and meet the needs of both medium and large companies.

Web services API ensure ease of integration with existing enterprise hardware and software infrastructure.
